

The specialists for integrated planning

Connector - Unit4 FP&A Integration in Power BI

Seamless connection - Unit4 FP&A and Power BI

Are you currently using Unit4 FP&A (prevero) and would like to analyze and report your data in Microsoft Power BI? Then we have good news for you: The Power BI Connector from smartPM.solutions is now available. This connector establishes a seamless connection to all structure, transaction and metadata in prevero and gives you live access to it in Power BI.

Expertise from 25 years of market experience

"Our project-experienced consulting team not only adapts the planning solutions to the company's requirements, but also helps to set up smart workflows and optimize processes. Our plus: a wealth of expertise and practice proven solutions from over 25 years of market experience."

Alexander Hein, CEO smartPM.solutions

What customers say about us

"The integration of Power BI by smartPM.solutions has revolutionized our financial planning and given us a completely new perspective on our company data. I would highly recommend MS Power BI technology and working with smartPM.solutions to anyone."

Rolf Herrmann
Head of Subsurface Engineering

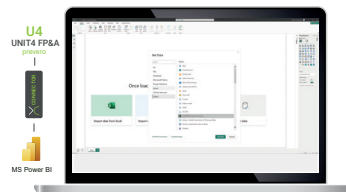

Direct access to Unit4 FP&A source data

With direct access to Unit4 FP&A prevero source data, the Power BI Connector from smartPM.solutions offers a simpler, faster and less error-prone alternative to cumbersome CSV exports. This gives you more time to use your data for analysis and reporting.

FP&A data in Power BI with just a few clicks

You can call up your FP&A data in Power BI with just a few clicks. All the data you require is displayed in the usual structure, with dimension hierarchies and links to the FP&A cubes. The data can be loaded into Power BI as raw data or already structured for further processing.
